

# PRIMO GX2

A VERDESIAN NUE SOLUTION™

**Primo GX2 is an in-furrow, multi-strain, dual action granular inoculant for pulse crops.**

## FEATURES

- Minimum guarantee of 100 Million ( $1 \times 10^{10}$ ) CFUs per gram
- Powered by 100 Thousand ( $1 \times 10^5$ ) CFUS of *Azospirillum brasilense*
  - Proven to increase root growth and overall mass leading to increased water and nutrient uptake
  - Has shown to increase solubilization of phosphorous and other key nutrients.
  - Can also result in an increase in the total number of nodules and better distribution across the root system for better nitrogen utilization within the plant
- Double screened peat-based formulation with excellent flowability
- The most ideal product to use in all uncertain or adverse growing conditions (from extremely dry to extremely wet).
- One single formula and Rate for all Peas, Lentils, and Faba Beans
- Formulations also available for Chickpeas or Dry Beans

## RATE CARD

Peat-Based Granular Inoculant Rate Chart		Bulk Density of 43 lb/ft <sup>3</sup> (0.7g/cm <sup>3</sup> )						
Spacing	7"	8"	9"	10"	12"	15"	24"	30"
